### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1626

Receipt is acknowledged of the preliminary amendment filed July 7, 2003 and the information disclosure statement filed October 27, 2003, which have been entered in the file.

The first paragraph of the specification concerning the related applications should be updated to insert the patent number of U.S.S.N. 09/899,516.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 106, 108 to 110, 117, 120, 121, 123 to 125, 127 and 128 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation of "substrate" or "cyclic substrate" in claims 106, 108 to 110, 121, 123 to 125, 127 and 128 finds no antecedent basis in claims 94 and 113 on which they are dependent. Claims 94 and 113 recite "chiral cyclic substrate" and "stereoisomerically enriched cyclic substrate". It is not clear which substrate the claims are referring to.

Art Unit: 1626

The recitation of "metal" in claim 117 finds no antecedent basis in claim 113 on which it is dependent. Claim 113 refers to a "metal atom".

The recitation of "catalyst" in claim 120 finds no antecedent basis in claim 113 on which it is dependent. Claim 113 recites "non-racemic chiral catalyst".

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 94 to 128 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 to 81 of U.S. Patent 5,665,890, 1 to 24 of U.S. Patent No. 5,929,232 and claims 1 to 29 of U.S. Patent 6,262,278. Although the conflicting claims are not identical, they are not patentably distinct from each other because the processes overlap since the silyl azide of the

Art Unit: 1626

instant process is a subgenus of the nucleophile recited in the process of the patents. The process of the instant application differs from that of the patents in that the process of the patents is broader. The process of the patents uses any nucleophile whereas the instant process uses a silyl azide. One of ordinary skill in the art would have been motivated to carry out the claimed process with the expectation of obtaining the desired product.

The references made of record and not relied upon show the state of the art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fiona T. Powers whose telephone number is (571)272-0702. The examiner can normally be reached on Monday - Friday 8:00 AM to 4:30 PM.
